

Dubrovnik Cornflower, *Dusty Miller*

GENERAL

| | |
|-------------|--|
| Origin | : Mediterranean, sub-tropical, tropical |
| Humidity | : semi-arid, semi-humid |
| Propagation | : direct sowing, sowing and pricking out, cuttings, division |
| Maintenance | : low |

CONDITIONS

| | |
|----------------|------------------|
| Urban climate | : resistant |
| Dessication | : resistant |
| Stagnant water | : vulnerable |
| Irrigation | : low |
| Salinity/ppm | : low (1000 ppm) |
| Hardiness | : -9°C |

SHAPE

| | |
|---------|------------------------|
| Type | : perennial, sub-shrub |
| Height | : 0.3 m-0.4 m |
| Spread | : 0.3 m-0.6 m |
| Foliage | : evergreen |

FLOWER

| | |
|--------|---------------|
| Colour | : yellow |
| Size | : 1.5 cm |
| Period | : April - May |

FRUIT

| | |
|---------------|----------|
| Type of fruit | : achene |
| Fruit size | : 1 cm |

This is a relatively short-lived perennial, with rosettes of striking, silvery-grey, lobed leaves. It is known commonly as Dusty Miller and has its origin in the Mediterranean and Croatia. It is to be found in Arriyadh in gardens and sometimes parks, where it has adapted well to the desert climate. The plant grows to a height of about 30 cm and produces side-shoots to about the same diameter. The fat, thistle-like, bright-yellow flowers show off well against the grey foliage. Plants thrive and grow fast, at first making compact mounds in dry or minimally irrigated even poor, stony, well-drained soils. Propagation is by seed or cuttings taken by pulling a 'heel' from the parent plant. Cuttings root relatively easily and it is therefore possible to replace the parent plant quickly when it has become worn out. Plants can also be lifted and divided in winter. They are generally frost-tolerant and pest-free. With its silvery foliage, *C. ragusina* is a useful plant for creating colour contrasts in the garden; it also blends well with desert plants in an arid situation, where such plants often also have grey foliage. Relatively maintenance-intensive, although it can be left to run wild, it does not have any particular landscape value for large-scale schemes.
