# Parrot Leaf

Native to Central and South America, this is a very low, fast-growing and easy-to-grow tropical groundcover plant for certain situations in the Arrivadh region. In a garden setting with ample irrigation, the plant adds a spot of striking colour, especially if the red-leaved varieties are chosen. This is a compact, herbaceous perennial, planted for its crisped and corrugated leaves which, according to variety, may be a stunning green or red in colour. The small, pale flowers are quite insignificant, although they are in bloom all year. Relatively frost-tolerant, it is propagated from cuttings, 2 to 5 cm in length. These root quickly and are best planted in organically rich, consistently moist, but not too wet, well-drained soils in full sun, or in partial shade. Alternatively, seed can be sown as soon as ripe. As a perennial, the plants can also be divided in spring. Maintenance includes pinching stems or moderate shearing to keep the plants compact and bushy. A. ficoidea is susceptible to nematodes and mealybugs, and often becomes very patchy; spider mites should be hosed off with water and fusarium wilt is combated by reducing water and removing infected plants. Useful for edgings and carpet-bedding in beds, borders, containers, or under trees and shrubs, it can also be grown as a cool-season annual in hot climates. Good in a formal garden or for seasonal interest. Plant 10 to 25 cm apart for groundcover effect. It will need replacing after a very hard frost. If desired, feed twice weekly with a balanced soluble fertiliser.

## GENERAL

Origin : tropical
Vigour : normal growth rate
Humidity : semi-arid, semi-

humid, very humid

Propagation : cuttings

Maintenance : moderate

## CONDITIONS

Urban climate : vulnerable
Dessication : vulnerable
Stagnant water : vulnerable
Irrigation : medium
Salinity/ppm : moderate (2500 ppm)

Hardiness : 0°C

#### **SHAPE**

Type : perennial
Height : 0.1 m
Spread : 0.2 m
Foliage : evergreen

## **FLOWER**

Colour : white Size : 1 cm

Period : August - August

# **FRUIT**

Type of fruit : capsule
Fruit size : 0.2 cm
Toxicity : edible when processed
